

Postdoctoral Research Fellow Position £31342 - £34233

A postdoctoral position is available to undertake research investigating synaptic vesicle recycling in both preclinical and human models of Huntington's disease. The position is for two years and is based at the Centre for Integrative Physiology. You will be ambitious and self-motivated and join a well funded research laboratory within a vibrant research community focussing on synaptic function/dysfunction in disease. Experience in cell/molecular neuroscience and live cell fluorescence imaging is particularly desirable.

Apply online and view further particulars at our website (<http://www.ed.ac.uk/schools-departments/human-resources/jobs>). Job reference is: 031913.
Closing date: 11th December 2014.
